

# FROM GATE TO PLATE

Raising the best pigs in the world is a big job! Once pigs are ready to go to market, they are transported in specially designed trucks.

New truck designs include sprinklers and fans to help keep pigs cool on hot days and heaters to keep them warm on cold winter days. Some even have elevators called “lift decks.”

*Connect the dots to see the special trucks used to transport pigs and colour the rest of the picture.*

## DID YOU KNOW?

All truck drivers delivering pigs to pork processing plants in Manitoba receive special training.
